

Your Name

Today's Date

Class Period is either 3 or 6 or 7

Overlay three plots

Different resolutions

Describe

- How many trials? Is it a fixed number? Or does it vary depending on the P value?
- Which values of P do you sample? Fixed increment? How many? Or does it vary?

Determine

- Peak value (P,T) for each curve
- Runtime for each resolution

Comments

- Tricky bugs to resolve
- Clever tricks to boast of
- Anything else
- Okay to write NONE
